

## StarViewer for iOS Release Notes

---

### Version 1.2.2 Released on 13-May-2026

#### *New features:*

- Ariel & StarViewer log files formatted to be compatible with StarLab

#### *Updates:*

- Updated with latest Apple libraries (Xcode 26, Swift 5)
- Other minor updates & fixes

#### *Fixes:*

- Application crashes after some time (due to refresh?)
- No measurements received after importing log from Ariel
- Graph line disappears following an 'Over' range
- Flickering battery and temperature notification
- Over range status stuck

#### *Known issues:*

- Doesn't support Quasar
- Doesn't support Juno
